To Whom It May Concern,

It is with great pleasure and heartfelt appreciation that I write this testimonial regarding the recent Organization for Caries Research (ORCA) Congress held in Heraklion, Crete, from July 3–6, 2024. This remarkable event, organized with unparalleled skill and dedication by the congress office, CONVIN S.A., was a shining example of what can be achieved through professionalism, collaboration, and a deep passion for advancing scientific knowledge.

From the beginning, the meticulous planning and thoughtful execution of every aspect of the congress were evident. Every detail was carefully considered, creating a seamless experience for all participants. Whether it was the ease of registration, the clarity of communication, or the flawless logistics on-site, the team ensured that attendees could focus entirely on the rich scientific and social program.

The scientific content itself was a highlight, featuring an expertly curated program showcasing cutting-edge research and innovative ideas in caries research. The sessions were highly informative and fostered stimulating discussions that left participants inspired and eager to take new insights back to their respective institutions and practices.

What truly stood out, however, was the atmosphere of inclusivity and connection that the organizing team cultivated throughout the event. Researchers, clinicians, and students from diverse backgrounds felt welcomed and valued, creating a vibrant and supportive environment that encouraged the free exchange of ideas and meaningful collaboration. This sense of community is rare and invaluable, making the congress an unforgettable experience for everyone.

Beyond the scientific aspects, the location in beautiful Heraklion added a unique charm to the event. The warm hospitality, cultural richness, and stunning surroundings perfectly complemented the excellent organization, leaving participants with professional enrichment and personal memories to treasure.

Collaborating with the dedicated team at CONVIN S.A. has been an absolute privilege. Their unwavering commitment to excellence and genuine care for every participant's experience have set a new standard for scientific congresses. To anyone seeking a reliable, passionate, and highly professional organizing team, I wholeheartedly recommend CONVIN S.A. and its exceptional services. I am confident that any event in their capable hands will be met with the same success and positive impact.

Warmest regards,

Christos Rahiotis,
