10/11/2024

To all the CONVIN staff,

With the conclusion of the 2024 Congress of the European Orthodontic Society, I would like to extend my gratitude and thanks to the staff of CONVIN for their excellent performance. The Congress was very challenging, with over 2,000 participants from more than 80 countries around the world, and a large trade exhibition. The participants responded with very positive comments for the organization of the scientific lectures, poster presentations and networking events, especially the opening ceremony, which presented a comprehensive history of Greek music and dance.

During the congress, the CONVIN staff were always present, attending to all the participants' needs. The lunch boxes were very well prepared, and any leftovers were donated to local charities to minimize food waste.

My collaboration with CONVIN was without problems and everything ran smoothly. All potential difficulties were proactively taken care of, in an efficient way, always with professionalism and a smile. This certainly took away any stress and created an atmosphere of total confidence on the success of the event. CONVIN have a large experience working with the MEGARON Conference Center, and this greatly facilitates the cooperation and organization needed for a successful result.

I will certainly select CONVIN again for any future events. It was recommended to me by a colleague, and I recommend it in turn, without any reservations.

Special thanks to Vaso, Georgia and Liana!

Demetrios Halazonetis, Prof. of Orthodontics,
